SKILLS

Strong: Javascript, Ruby, Node, Express, Angular, Rails, SQL, MongoDB, HTML, CSS, JQuery, AJAX, Heroku, JSON, Git

Experienced: Sinatra, AWS, Leaflet.js, RSpec, Service-oriented Architecture

RECENT PROJECTS

HappyTree I Full-stack Engineer

Web application to provide standardized testing for reading and letter recognition.

- Architected Angular front-end to store data locally and minimize API calls, saving server resources.
- Developed client facing responsive views for self guided digital standardized testing.
- Built Node back-end with RESTful API and Auth to store secure mongoDB data.
- Reduced testing time by 80% per classroom through automated platform.

HomeAware I Full-stack Engineer

Location based application to display environmental hazard information.

- Developed custom geocoding control for repositioning functionality by using address to find coordinates.
- Gathered data from third party API's and rendered complex mapping features like coordinates, maps, and geoJSON data with dynamic user-controlled functionality.
- Created Node API endpoints on a server to allow easy access to geoJson information.

#HiveMind I Software Engineer

Displays Twitters streaming data using dynamic graph and 3D globe.

- Developed and designed animated front-end UI controls to display information.

EXPERIENCE

Baby Word I Full-stack Software Engineer - 2014

- Design and develop internal facing application to help business processes.
- Created RSpec test for models to ensure data integrity ensuring correct calculations of orders.
- Increased efficiency of client interaction and improved client satisfaction through improved workflow.
- Take client feedback and quickly execute changes by adding features.

Med Chefs I Software Engineer - 2014

- Angular front-end feature creation for administrators to update content.
- Managed application errors and bugs by taking issues and making adjustments.

Dev Bootcamp I Coach - 2015

- Lead software engineering students through algorithm challenges.
- Advise on JavaScript best practices

EDUCATION

Dev Bootcamp I Full Stack Web Development

2014

UC Davis I Bachelor of Arts, Communication

2010

PERSONAL

I want to figure out what makes students tick and how technology can improve education, also, I love the outdoors, hiking and backpacking.
